

FUSION REFERENCE

FEATURES INCLUDE:

- 5.5" Carbon Wool Drivers
- 1" Dyna Silk Dome Tweeters
- British ESA Clarity Capacitors
- Seamless Tapered Ends
- Proprietary Sound Deadening Coating
- Custom Threaded Inserts
- High-Gloss Piano Black Stock Finish
- 3/4" MDF and Baltic Birch CNC Construction

The Fusion Reference Soundbar ("FRS") is our flagship 3-channel on-wall bar speaker system intended for 75" or larger televisions. Designed for ultra-high resolution clarity, dialogue intelligibility and lifelike soundstage, the FRS is comparable to Reference grade floor standing towers and in-wall speaker systems that also include a dedicated center channel. Three large speaker cabinets are replaced by a single, elegant, soundbar format with beautifully sculpted ends and finishes, custom fabricated to precisely fit within the form factor of your existing television.

NEXTLEVEL ACOUSTICS - "CHANGING EVERYTHING YOU KNOW ABOUT THE SOUNDBAR EXPERIENCE"
