

CI-IC44A IN-CEILING

The **CI-IC44A** is an audiophile grade in-ceiling speaker system capable of high output reference caliber sound. Its "fast" dynamic response provides unsurpassed clarity, while its 20-degree down angle gives it the versatility for use as a high quality main LCR, surround or height speakers. Features include MDF construction, fully enclosed rear cavity, aluminum outer frame, designer cloth Infinity grille and rigid mounting system. The **CI-IC44A** should be paired with a subwoofer to finish the frequency range.
